Some additional information for the call:

- Above is a prioritized version of the task list sent last week (below) - we'll be going over this file on the call.
- Call-in information for audio is provided above. I've also set up a web conference, so that we can view the Quickr page. To access the web conference, go to <http://portal.epa.gov/webconference>. On the top right, under Join Conference, enter the Conference ID and your name in the name field - that should get you a view of my desktop.
- You can check out the draft mining scenario text on mitigation on the Quickr site. It's in the mining scenario room - I believe everyone should now have access to the rooms, but if you don't let me know and

I'll send you a copy of the text (and try to fix the room issue).

- Again, main purpose of this call is to get specific about who's in charge of what, and to begin setting some interim deadlines for material.

Hi all,

Scheduling is going to be a challenge. I checked this time with as many folks' calendars as I can see, but if this time doesn't work please let me know - I'll try to make it so the most folks can attend, without having to schedule this for 4 weeks from now.

Attached are 3 files: the task list we saw in yesterday's kick-off call, the matrix file from which the task list was generated, and the most recent outline of the mining scenario section. Keep in mind these are all draft files. Both the outline and task list need to be revisited, to focus on what we can do in the time we have. We will distribute a prioritized version of the task list early next week, but these files should at least give you an idea of where the scenario is heading.

Purpose of this call will be to go through these files and start figuring out the specifics of who's doing what.

Please let me know if you have any questions, if I missed someone on the invite list, or if any other issues arise.

Thanks! Kate
